Power

# SPI Installation Instructions

Tools Required:
• Channel lock pliers
• 1" torque wrench set to 130 in/lbs

Assembly Time:
Approx. 10 minutes

Primary SPI
Alternate SPI →
Alternate SPI →

1. Locate opening for SPI installation. A knockout is reserved for installation of a secondary SPI (if required).

2. Hold the SPI in place using channel lock pliers while tightening nut. Torque to 130 in/lbs.

3. Connect SPI to power supply. For wiring instructions, refer to the XM Series 2 Technical Manual, which can be downloaded at www.alpha.com.
